#### **ABOUT ME**

### Professional Full Stack Developer (PHP, Laravel, CodeIgniter)

Greetings! I am Muhammad Ashar Noman, a dedicated and skilled Full Stack Developer with expertise in PHP, Core Laravel, and Codelgniter frameworks. With a passion for crafting innovative and high-performing web applications, I bring a wealth of experience in both front-end and back-end technologies, ensuring seamless user experiences and robust functionality.

#### WORK EXPERIENCE

15/08/2023 - CURRENT Lahore, Pakistan

#### PHP DEVELOPER(LARAVEL & CODEIGNITER) XDIMMENSION SOLUTIONS PVT LIMITED,

At XDimmension Solutions, I have been instrumental in developing comprehensive eCommerce solutions, a dynamic newspaper portal, and an agrigate marketplace platform.

My key responsibilities include:

## **ECommerce Solutions:**

**Product Management:** Designed and implemented systems for managing product listings, categories, pricing, and inventory with user-friendly interfaces.

**Order Management:** Built modules to streamline order processing, including placement, status updates, fulfillment, and bulk handling.

**Tax Management:** Created dynamic tax calculation systems ensuring compliance with local, state, and international regulations.

**Payment Methods:** Integrated multiple payment gateways (e.g., PayPal, Stripe) and implemented secure payment processing.

**Order Tracking:** Developed real-time tracking systems and integrated with logistics partners for accurate delivery updates.

**Logistics Integration:** Connected the platform with leading logistics providers for streamlined shipping and automated label generation.

**SMS and Email Confirmation:** Automated notifications for order confirmations, shipping updates, and promotions, enhancing customer communication.

**Reporting:** Created detailed reporting tools and dashboards for insights into sales, inventory, and customer behavior.

**API Development:** Designed and developed RESTful APIs for seamless integration with third-party services and applications.

#### **Newspaper Portal:**

**News Management:** Built a content management system for handling articles, categories, tags, scheduling, publishing, and archiving.

**Ads Management:** Created a module for ad placements, rotations, tracking, and integration with ad networks for effective monetization.

## **Agrigate Marketplace Platform:**

**Customer, Admin, and Portal Side:** Developed separate interfaces and functionalities for customers, admins, and portal management.

**Deals Management:** Implemented systems for creating, managing, and tracking deals and promotions. **Bidding:** Built a bidding system to enable competitive pricing and auction-style sales.

**SMS APIs:** Integrated SMS APIs for notifications, verifications, and customer communications.

**Product Management with Variations:** Designed a comprehensive product management system accommodating product variations and attributes.

**Transaction Reports:** Developed detailed transaction reporting tools for financial analysis and tracking. **Blogs:** Integrated a blogging platform to enhance content marketing and customer engagement

#### PHP DEVELOPER(LARAVEL & CODEIGNITER) EEIZO IT SOLUTIONS, SAHIWAL, PK

## **Hospital Management System:**

**Patient Management (IPD and OPD):** Developed modules for managing inpatient and outpatient data, including patient records, treatments, and history.

**Appointment Scheduling:** Built a comprehensive system for scheduling and managing patient appointments with doctors and specialists.

**Inventory Management:** Implemented inventory control for medical supplies, medications, and equipment. **Doctor and Staff Management:** Created tools for managing staff schedules, roles, and information.

**Billing and Invoicing:** Developed a billing system to generate and manage invoices, track payments, and handle insurance claims.

## **Restaurant Management System:**

**Menu Management:** Designed a dynamic system for creating and managing menus, including items, categories, and pricing.

**Order Processing:** Built an efficient order processing system for dine-in, takeout, and delivery services. **Table Reservation:** Implemented a reservation system for customers to book tables in advance.

**Inventory and Stock Control:** Developed inventory management tools to track stock levels and manage supply orders.

**Payment Integration:** Integrated multiple payment methods to streamline the checkout process. **Reporting:** Created detailed reports and analytics for sales, inventory, and customer preferences.

#### **Call Center Lead Generation System:**

**Lead Generation:** Developed a robust system for generating high-quality leads efficiently.

**Lead Segmentation:** Implemented advanced segmentation features to categorize leads based on various criteria.

**Lead Tracking:** Built comprehensive tracking systems to monitor lead status and interaction history. **Reporting and Analytics:** Created detailed reporting tools and analytics dashboards for insights into lead performance, conversion rates, and campaign effectiveness.

12/09/2020 - 31/12/2022 Sahiwal, Pakistan

## PHP DEVELOPER(LARAVEL & CODEIGNITER) TECHNOIN SOLUTIONS, SAHIWAL, PK

**Leave Management System:** Developed a comprehensive Leave Management System that simplifies employee time-off requests, ensuring smooth scheduling and efficient absence tracking. This promotes workplace productivity and organization.

Key features include:

**User Management:** Manage employee profiles and access rights.

**Leave Request Module:** Streamline the process for employees to request leave.

**Leave Approval Module:** Efficient workflow for managers to approve or reject leave requests.

**Reporting and Analytics:** Generate detailed reports on leave patterns and trends. **Holiday Management:** Manage public holidays and custom company holidays.

**Integration with Payroll:** Seamless integration with payroll systems for accurate salary adjustments.

Leave Balances Module: Track and display leave balances for each employee.

**School Management System:** Developed a feature-rich School Management System to enhance collaboration, simplify academic record-keeping, and improve overall school operations. This fosters a productive and engaging learning environment.

**Key features include:** 

**Student Management:** Maintain detailed student records and academic history.

**Assignment and Homework Management:** Streamline the assignment and homework submission process. **Communication and Messaging:** Facilitate communication between students, teachers, and parents.

**Fee Management:** Manage fee collection and track payment status.

**Staff Management:** Oversee staff records, schedules, and performance.

**Reporting and Analytics:** Generate reports on student performance and school operations.

Parent Portal: Provide parents with access to their child's academic progress and school information.

**Recruitment System:** Developed an efficient Recruitment System to streamline the hiring process, enabling businesses to post jobs, track applications, and manage candidate profiles effectively.

## **Key features include:**

**Simplified Job Posting:** Easy interface for creating and managing job postings.

**Applicant Tracking:** Track applications through various stages of the hiring process. **Recruitment Process Management:** Manage the entire recruitment workflow from application to hiring. **Job Seeker Side and Company Side:** Dedicated interfaces for job seekers to apply and for companies to manage postings and applications
